

The main objectives

Adaptable

Enable communication between all stakeholders, improve time management for social and health professionals and help to achieve an efficient, flexible and adaptable solution.

Practical

Facilitate and improve care management for older adults living with neurodegenerative and other chronic conditions.

Personalised

An interactive, personalised model, developed to meet users' needs, to adopt healthy habits, maintain a daily routine and follow advice from care teams.

Multi-disciplinary communication

Enabling communication across sectors and disciplines to improve time and cost-efficiency, and communication with and across users to strengthen support.

PROCare4Life

Personalised Integrated Care Promoting Quality of Life for Older People

International Foundation
for Integrated Care
A movement for change

This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Grant Agreement No. 875221.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Grant Agreement No. 875221.

About PROCare4Life

PROCare4Life is an EU funded project proposing an integrated, scalable and interactive care ecosystem, easily adapted to several chronic diseases, care institutions and end-user needs. This would benefit patients, caregivers and health professionals.

Consisting of 14 partners from 6 EU Member states, PROCare4Life promotes quality of life for older adults. Co-ordinated by Kinetiko-Driven Solutions LDA in Portugal, PROCare4Life is a 3 year project and will have an impact at several levels, including local, regional, national, European and internationally.

It aims to build on strong communication connections with the relevant research and innovation activities of Horizon 2020 and other EU, national and international programmes. Key stakeholders are involved in various health and care domains, and located in six geographic locations.

A broad range of collective knowledge and expertise is brought together by PROCare4Life partners. These include key opinion leaders and influencers:

- from research and innovation to large-scale deployment in digital health
- from interoperability and standards, to health service innovation
- from the technical to the policy levels

Who is the project for?

Individuals and families

Individuals living with chronic conditions, older adults, recipients of care services, patient associations.

Care providers

Health and social care professionals, institutes advocating for and implementing integrated care.

Health authorities and legislators

The EC and its various directorates-general, European Parliament, WHO, OECD, G7. Parties that enable delivery of citizen data, access and usage (privacy protection, health technology assessment regulators).

Health data users

Parties that make use of aggregated large-scale big data including academia, clinical research platforms, networks or centres for disease research (e.g., cancer, rare diseases).

Infrastructure and ICT providers

Parties that provide European-scale infrastructures and interoperability, including e.g., electronic health record (EHR) platform vendors, mHealth apps developers, and wearables developers.

Health and care experts

Experts, key opinion leaders and influencers.

Consortium partners

PROCare4Life partners, including their partners' networks of more than 500 members from all the EU member states representing national, regional and EU-wide stakeholders.

Other stakeholders

Engaged partners from EIPonAHA and Innovation to Market (I2M), stakeholders associated with success stories and identified best practices.
