

# Digital solutions to support a better quality of life

## REMOTE CARE

### Abstract

Four projects funded by the European Commission are working to raise awareness on and promote digitally-enabled integrated care solutions in the eHealth market, leveraging on their differentiators. These include multifunctional and integrated capabilities, chronic disease specialisation, tried, tested, and co-developed with practitioners and users.

### Challenges

- ◆ Health, demographic change and wellbeing
- ◆ Develop and implement solutions for medical symptoms and behaviour monitoring
- ◆ Better access to live patient information to multidisciplinary care teams
- ◆ Provide collaborative tools to improve working conditions and optimise work-time management and coordination of healthcare and social care providers
- ◆ Deploy solutions in real-world contexts
- ◆ Use mobile phones to support real-time and remote monitoring and reporting between patients and clinicians
- ◆ Lack of adoption of digital solutions in the health and care sector
- ◆ Understand applicable business models and how to commercialise solutions, and clinical risk algorithms

### Results

- ◆ Remote care solutions
- ◆ Personalised care platforms
- ◆ Clinical decision support platforms

# Digital solutions to support a better quality of life

## REMOTE CARE

## Stakeholders

Citizens

Health and care provider organizations

Research and Academia

Private Sector (SMEs or eHealth providers)

## Projects

### ProCare4Life

Bringing forward an integrated, scalable and interactive care ecosystem, easily adapted to several chronic diseases, care institutions and end-user needs.

[procare4life.eu](http://procare4life.eu)

Grant Agreement No. 875221

### eSMART

Developing a real-time, mobile phone-based remote patient monitoring system for cancer patients - the Advanced Symptom Management System (ASyMS)
